Battery Indicator

When the headset is connected to a device with iOS system, a battery indicator will appear at the upper right of the system, indicating battery status of the headset.

Charge

Your headset has enough power to complete the pairing and a few calls. When battery is low, you will hear the voice prompt "Low battery". It takes 1.5 hours to fully charge the headset. The red LED turns on during charging. The red LED will turn off and the blue LED will turn on after being fully charged.

Connection standby

After successful pairing and connection, you will hear the voice prompt "connect successful". the headset will be in turning on mode or standby mode automatically and the blue LED will flash once every 5 seconds, when the headset dis connect the phone, you will hear the voice prompt "lost connect".

Automatic connection after powering on

In turning off mode, press and hold the Multifunction Button for about 2 seconds and release. The headset will search valid devices paired before and connect with them automatically, with the voice prompt "connect successful".
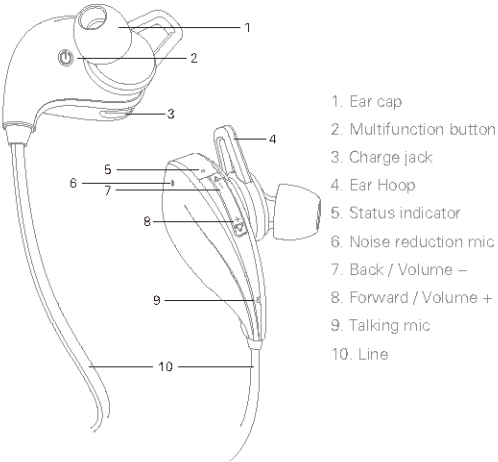

Power off

In turning on mode, press and hold the Multifunction Button for about 4 seconds. The red LED will flash three times rapidly before turning off. A voice prompt "power off" will appear, indicating the headset has been turned off.

Hard reset

In turning on mode, press and hold the Multifunction Button with the charger plugged to reset the headset. Then the red LED will light (you can release the Multifunction Button 2 seconds after mounting the charger).

Easy to use

Basic operation

1. Volume control: Press and hold the "+" or "−" button for a short time during calls or music playing, the volume will change level by level with a "beep" for each level change. If you press the "+" or "−" button after the maximum volume or minimum volume is reached, the volume will not change. The "beep" at this moment means that the volume has been adjusted to the maximum or minimum.

2. Multifunction button: this button is used to turn on/off the phone, connect and reset headset, etc.

3. LED indicator and voice prompts: When you turn on the headset, the blue LED will flash three times and a voice prompt "power on" will appear. When you turn off the headset, the red LED will flash three times and a voice prompt "power off" will appear. When your headset is in turning on mode or in standby mode, the blue LED will flash once every 5 seconds. During an incoming call, the blue LED will flash continuously. If the call is finished, the blue LED will flash once every 5 seconds. If your headset is being charged, the red LED will light. If your headset is fully charged, the red LED will turn off and the blue LED will turn on.

Pair & connect

1. With the headset power off, press and hold the Multifunction Button for about 6 seconds. You will hear the voice prompts "power on" and "pairing" and see the blue LED and red LED flash alternately.

2. Turn on the Bluetooth feature on your mobile phone or other devices, then use menus to "add", "search" or "scan" new Bluetooth devices.

3. Choose "Muses1" from the Bluetooth device list of your mobile phone or other devices and connect (if you are required to enter the password, enter 0000). When connected, you will hear the voice prompt " connect successful". Now you can use the call function or listen to the audio on your mobile phone or other devices.

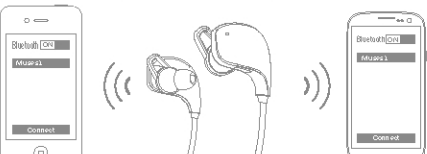

Auto power−off

1. The headset will power off automatically after the headset is left 20m (or more) away from the mobile phone for 30 minutes.

2. The headset will power off automatically if left unconnected for about 10 minutes.

Multipoint connection

1. With the headset power off, press and hold the Multifunction Button for 4 to 7 seconds to turn the Bluetooth feature on and enter paring mode.

2. Turn on the Bluetooth feature on the first mobile phone to pair with the headset. Turn off the headset after they are connected.

3. Turn on the Bluetooth feature on the second mobile phone to pair with the headset.

4. Turn on the Bluetooth feature on the first mobile phone, choose previous "Muses1", and connect directly.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
